(54) Title: METHOD OF CREATING A WEB-SITE

(57) Abstract: According to one aspect of the invention, there is provided a system for enabling a user to create a web-page of a web-site. The system includes a database on which a plurality of different modules (2014, 2016, 2018, 2020, 2022, 2024, 2026) is stored and selection means arranged to enable a user to select modules from the database. The system further includes population means arranged to enable the user to populate the selected modules with desired information and display means arranged to cause the selected modules to be displayed on a digital display surface (2010) in a populated condition, in which each module is populated with the desired information, and in which the modules are displayed in a vertically stacked fashion one immediately adjacent another.
